Review is currently based on my first time playing, single player in desktop mode. Simplistic dungeon runner game. Either try to run like hell or fight your way through. Does not appear to be a ton of depth behind it, but I only made it to level 4 and completed two runs. Currently only four weapons to choose from, would love to see upgrades and new weapon types! Character leveling is linear and Im not exactly sure what you get for leveling up. Cant say I would buy it again at the current price. Like a lot of these games, the potential is there. just keep going with it! I am excited to try the boss battles in VR though! Will update
